## SHALL WE EXPORT OUR ELECTRIC POWER OR RETAIN IT FOR USE IN MAINE?

Under answer Ex-Governor Baxter's question No. 1 and No. 2 as reported in the *Norway Advertiser* of Aug. 25th. These questions were the vital points in his campaign for the gubernatorial nomination. He has now answered them in a complete reversal of position. He has advised us to vote Yes.

Question No. 2. "Exported surplus power can be recalled whenever it is needed in Maine."

All parties agree that power so exported becomes interstate commerce. The constitution of the United States prohibits the states from the states all commerce between the states and foreign countries.

Anyone who cares to read the history of the power question, after the close of the election, will recall that this was one of the vital questions that led to the election of that famous document, the constitution of the State of New York (The Government of the Revolution).

Under this State to be the big thing in the republic and capable of doing the things they pleased, without regard to the constitution or the law.

These assessed heavy and very disagreeable duties on all goods brought into New York from New Jersey, Delaware and Connecticut. Even a small boat was not allowed to enter and depart from the wharves without clearance.

The Governor Clinton refused to allow the officers to collect duties in New York and also to pay their part of the debt. He would have no more of the officers' duties with his business.

**Road shock Eliminator**

**.. and New Steering Gear**

make Buick

This shows the Buick Road Shock Eliminator, an exclusive feature on all 1930 Buicks.

make Buick the easiest car in the world to drive!

The road shock eliminator—built into the front of the frame on the steering gear side—absorbs every jolt and jar arising from road inequalities, and thus prevents their transmission to the steering wheel and the driver's hands.

Imagine being able to travel the roughest road with your hands resting lightly on the wheel! Think of having an automobile which you can drive all day at any speed without feeling a single road jolt transmitted through the steering wheel!

Such are the fine results of two matched new quality features in the 1930 Buick—two features which add to this car's appeal as the greatest dollar value of the day: a wonderful new frictionless steering gear, and the new Buick road shock eliminator!

The new Buick steering gear, of the effective worm-and-roller type, moves with incomparable ease throughout its entire turning range, assuring instant, effortless response to the driver's every wish.

Come drive this new Buick. Head for the road you ordinarily avoid as too rough for comfortable travel. Test these twin features of comfort which make the new Buick the easiest steering car in its field!

## Feeding horses that don't work

The developed surplus power which is wasted in Maine each year amounts to the work 200,000 horses could perform worked continuously.

As interest and taxes remain the same regardless of the number of kilowatt hours generated by Maine Power Companies, the people of Maine pay for the millions of kilowatt hours that go to waste.

They are feeding 200,000 horses for which they can find no work to do.

The Surplus Power Export Law will permit this wasted horse power to be put to work in part and fed in other fields until Maine has use for the power within her own borders.

## SHREDDED WHEAT

With all the bran of the whole wheat
